

# I have amended adviser fees in Comparator, but the fees haven't changed? Why is this?

Last Modified on 26/04/2017 3:17 pm BST

Within Comparator **Setup**, you can set up adviser fees for both on and off platform products. If you have set up adviser fees for only one or the other and then select the other option as the final selection, the adviser fees may not have been taken into account, e.g. adviser fees has been set up within the **Platform** tab, but not in the **Off Platform** and the final selection is off platform product.

**Adviser Fees**

Complete the table below to ensure your adviser fees are applied to the calculation. Regular fees are charged per premium per product for both on & off platform products i.e. E10 defined below on a platform with 2 products would take E10 per product premium. You can also limit the number of premiums to be charged by entering the number of premiums in the column. Click the  icon to return to all.

Platform	Off Platform						
Product	Initial (E)	Initial (%)	Regular (E per premium per product)	Regular (%) per premium per product	No. of Chargeable Premiums	Ongoing (Epa)	Ongoing (%pa)
All Platforms	Mixed	Mixed	0	0	All	Mixed	Mixed
