

Can I remove all filters on the filtering screen?

Last Modified on 30/05/2017 2:08 pm BST

You can remove all the filters you have put in place, in one go, by clicking on the Clear all filters button at the bottom of the list of fields.

This simply removes the filtering and refreshes the screen. However, it does not remove any filtering which your compliance officer has both pre-set and locked.
