

# Can I delete users?

Last Modified on 13/06/2017 3:35 pm BST

User accounts can be deleted by opening the account, and then clicking on the **Delete user** link in the menu bar.

Please note that accounts can be disabled – via the **Account Settings** section of the user details – as well as deleted. However, this does not “free up” the disabled adviser’s licence for redeployment to another adviser – this can only be done if the user account is deleted.
