

Why is no Quote link being displayed for a product type?

Last Modified on 14/06/2017 10:59 am BST

The Quotes section above describes all the areas in which the system displays links to your quotation engine. There are three reasons why these quote links may not be displayed:

- You haven't entered the details of your quote engine into your user account.
 - You are researching a type of product which is not covered by your quote engine – for example, you are looking at ISAs, and these are not covered by the 3rd-party engine.
 - The quote engine does quote on the product type, but has not yet passed on to Synaptic the details of how to integrate in this area.
-
