# When running through a Phased scenario, why am I only able to make changes to the summary details in the phased drawdown screen and not within the final results?

Last Modified on 20/12/2018 10:47 am GMT

The edit buttons within the summary area are greyed out because if any changes were to be made in the final results, it would affect the details of the first phased period. It is best to fine tune the details within the first phased period first, before moving on.
