

Results - Multi Benefit

Last Modified on 01/06/2021 12:46 pm BST

If you are producing a Multi Benefit Quotation for different products, once you have completed all of the quote input pages, the results for all the quotes will be obtained and become available in the **Results** section as shown below.

In this example, you can view all the Multi Benefit results – as shown in left hand box under Results.

8 products declined to quote. Click to show products

If your Multi Benefit quote includes an Income Protections product, you will see the Income Protection Filter. This allows you to filter based on long or short-term options.

When involving a joint quote, you will see the following icons:

This icon indicates a Joint policy. Joint life cover insures two people, but a claim is paid out on one death only, usually the first death. The policy ends when the claim has been paid.

This icon indicates a Dual life policy. Dual life cover insures two people, but a claim can be paid on both deaths. If one person dies, the policy continues in the name of the survivor.
