**Additional information**  
Risk Explorer provides the full range of investment forecasts, allowing you to project on:  
• Nominal - Investment returns basis only (net of charges or inflation)  
• Nominal - Investment returns with costs and charges (net of adviser charges)  
• Real - Investment returns with impact of inflation (net of charges)  
• Real - Investment returns with costs, charges and inflation  
Use this screen to capture the costs and charges relevant to your scenario. Provide a breakdown of the charges, or supply a R.I.Y figure. Including costs is not mandatory (or leave as default of '0')

As you go through the steps, this will add a tick to the area in the breadcrumb trail.

You can select any of the previous steps to go back to that section:
