

Creating a Trial - Existing Salesforce Customers

Last Modified on 15/08/2023 3:14 pm BST

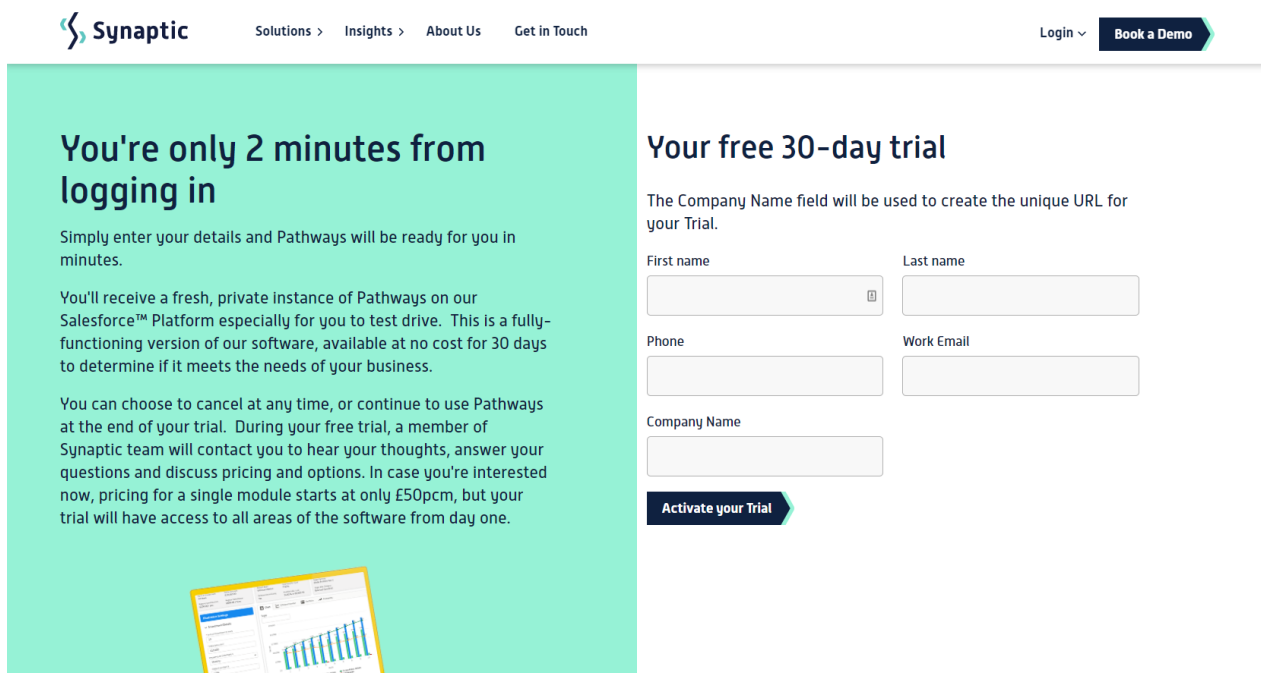

Your administrator will need to manage the package installation into Salesforce. Follow this link to Salesforce guidance on [Installing Packages](#). Please note - we do not require passwords for installations and always recommend installing on sandbox first for test purposes.

You can create a new trial through our website or through the Salesforce AppExchange.

Synaptic Website

Go to www.synaptic.co.uk/trial

Enter details you would use if your licence would be converted to a full licence. Your company name will be used to create an unique URL for your trial.

The screenshot shows the Synaptic website's trial sign-up page. The header includes the Synaptic logo, navigation links for Solutions, Insights, About Us, and Get in Touch, and a Login button with a dropdown arrow. A prominent 'Book a Demo' button is also visible. The main content area is split into two columns. The left column, on a teal background, features the headline 'You're only 2 minutes from logging in' and three paragraphs of text explaining the trial process. At the bottom of this column is a small image of a tablet displaying a software interface. The right column, on a white background, is titled 'Your free 30-day trial' and includes a note that the company name will be used for the trial URL. Below this are input fields for First name, Last name, Phone, Work Email, and Company Name. An 'Activate your Trial' button is positioned at the bottom of the right column.

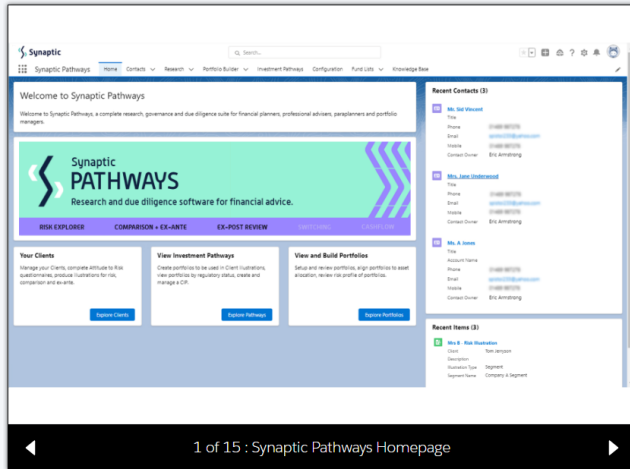

Salesforce AppExchange

Go to [Synaptic Pathways - Synaptic Software Limited - AppExchange \(salesforce.com\)](#)

As seen below, you are able to scroll through screenshots of Synaptic Pathways, view the Highlights and Description. Features, Requirements, Support Details, Data Sheets and White Papers can be found at the bottom of the page.

Research-led digital transformation for financial advice firms
Change up to Synaptic from pre-MiFID II systems and standalone tools. Embed automated advice, research and due diligence processes and cut out unnecessary cost, constraints and errors imposed by legacy research and technology

Overview Reviews

Highlights

- ✔ Supports goal-based financial planning as well as providing research to demonstrate proof of suitability. Audits the entire advice process from ATRQ, risk profiling, asset allocation, Capacity for Loss & portfolio construction to basis of recommendation.
- ✔ Offers a full compliance and governance solution within a PROD framework, managing platform, product, portfolio and fund panels. Firms can now fully configure and work within their Central Investment and Central Retirement Propositions.
- ✔ Full disclosure of costs & charges - platform, product, portfolio, special deal & adviser charges, disclosure for MiFID II. Ex-ante illustration & reporting capability. Full switching & pension consolidation research capabilities & automatic valuations.

Description

Firms which have struggled with research and advisory software in the past are likely to have tools and processes that do not fulfil the current requirements of MiFID II or PROD. This can cost firms time and resources as well as being prone to error.

An entirely new, comprehensive solution has been designed and built by Synaptic for the modern advisory firm to deliver streamlined and consistent advice, based on a firm's own investment strategy.

The research suite delivers comprehensive data on platforms, products, portfolios and funds across integrated research tools, including client risk profiling, investment risk profiling, asset allocation and forecasting from Moody's Analytics, together with costs and charges analysis to MiFID II disclosure rules (ex-ante).

Illustrations from Synaptic are produced automatically without rekeying and allow users to configure and work within a firm's own Central Investment (and Retirement) Propositions.

Synaptic research processes are complete and smooth, making it a delight to execute complex illustrations and formulate outstanding advice with research tools built exclusively on the Salesforce platform.
