

How do I remove the target amount red line from the graph?

Last Modified on 18/11/2021 12:57 pm GMT

When within the Advanced Options screen of an Illustration, there is a Target Field at the top left of the graph.

Entering a Target amount here will add a red target line within the graph, as seen below:

This field can also be populated when using the 'Solve Contribution' filter on the right side of the screen. If you are using other filters and would like to remove the red target line, delete the target amount from Target field within the graph:

Capacity for Loss Statement

My Client can afford to lose **13.79%** In any one year, as a worst case scenario this could equate to **£50,379.56** loss In the final year of the **10 Year** term proposed
