

# My Risk Explorer screen doesn't look right - How can I resolve this?

Last Modified on 18/11/2021 1:00 pm GMT

If you are having issues with the view of Synaptic Pathways, for e.g. aligned issues, this may be related to your browser. Ensure your browser is on the latest stable version.

Synaptic Pathways is best used on Google Chrome. See article [What browsers are supported?](#) for more information.
