The screenshot displays the Synaptic Pathways software interface. At the top, there is a navigation menu with options like Synaptic Pathways, Home, Contacts, Research, Portfolio Builder, Investment Pathways, Configuration, Fund Lists, Knowledge Base, My Apps & Settings, and Valuations. A search bar is also present. The main content area is titled 'Research Test Illustration Apr22' and includes a 'Convert to Holding' button. Below this, there are tabs for 'Research', 'Review', 'Client Check-In', and 'Report'. The 'Review' tab is active, showing a 'Capacity For Loss' questionnaire. The questionnaire consists of seven questions with multiple-choice or yes/no options. A 'Supporting Notes to meet MiFID Compliance' section is also visible, with a text area and a rich text editor. On the right side, there is an 'Additional Information' section with explanatory text. The bottom of the interface has 'Back' and 'Continue to Check-In' buttons.

Capacity For Loss

Use the Capacity for Loss Questionnaire to audit the discussion around whether committing to an extended term is appropriate for your client. It will not be appropriate to commit the client to long term savings if they cannot commit to leaving the funds invested long term.

1. My Client will need to start spending the investment return at the following point in the future. < 5 yrs 5 to 9 yrs 10 to 14 yrs 15 to 19 yrs > 20 yrs

2. My Client doesn't have any significant outstanding debts and doesn't expect to incur any during the period of the investment (eg. mortgage or credit cards). Strongly Disagree Disagree No Opinion Agree Strongly Agree

3. My Client's spouse, partner or family member is likely to be able and willing to support them financially if circumstances require. Strongly Disagree Disagree No Opinion Agree Strongly Agree

4. It would be relatively easy for my Client to cut expenditure in retirement if circumstances require. Strongly Disagree Disagree No Opinion Agree Strongly Agree

5. My Client is flexible about their investment horizon. They could wait before using their investment. Strongly Disagree Disagree No Opinion Agree Strongly Agree

6. In consideration of sequence risk, in the worst case scenario, my client can afford to lose 26.67% or more, in any one year, defined as the worst year of returns in the forecast, assuming a 20 year term. This equates to the 5% (or 1 in 20) worst outcomes from the Moody's mathematical simulation. This may equate to £4,560.57 in the first year. Yes No

Additional Information

A Client should not be exposed to risks they do not understand, nor are 'willing and able to take'.

The Moody's researchInvestmentItem calculates a 'min gain' value for the investment scenario which are displayed in question 6.

The 'min gain' is a stochastic value from the Moody's Analytics researchInvestmentItem and indicates the extent of losses expected in a 'bad year', defined as the worst performing year in a 20 year term or a 5% probability.

Advisers should use the 'min gain' to quantify possible losses in the short term and make a judgement as to whether losses are affordable to the client. A Client who is unprepared for loss is likely to sell up and crystallise losses, forgoing the opportunity to recover.

The longer money can be invested, the better the returns are likely to be. Capacity for Loss increases with term, so extending and recording a client's commitment to their investment horizon is an essential part of investment planning, risk management and proof of suitability.
