

Risk Illustrations - Charges & Fees

Last Modified on 13/02/2024 3:35 pm GMT

This article is a continuation of article [Illustrations - Pathway Selection](#)

In the Charges & Fees screen, you can either enter specific charges or use a total solution cost.

If using specific charges, click enable and enter the charge information.

The screenshot shows the 'Charges & Fees' configuration screen. It includes input fields for various charges and fees, and a section for 'Additional Information' explaining the return scenarios. The 'Generate Illustration' button is highlighted.

Please note - If the Ongoing Charge Fee field is greyed out, It has not been possible to automatically determine the Ongoing Charge Fee and you will need to enter the headline charge field.

If entering a total solution cost, enter the reduction yield figure:

This close-up shows the 'Use total solution cost' option selected, with the 'Reduction in Yield (RLY)' field containing the value 1.20%.

Continue to the Outcome screen:

This close-up shows the 'Back' and 'Generate Illustration' buttons at the bottom of the screen.

Forecast based on strategic asset allocation - No costs

Forecast based on investment scenario - No costs

What's Shown Here

Strategic Asset Allocation Comparison

Moody's stochastic engine is accessed directly by this application and provides data to populate these graphs, showing:

- Probability-based (stochastic) forecasts for the strategic asset allocation representing the risk category, alongside.
- The forecast is based on the investment proposal, or adviser recommendation. The simulation models the full range of viable outcomes.

The probabilities indicated are high and low final fund values expected by the model (5th and 95th percentile from the distribution model), and the average indicated is the 'expected outcome'.
