

Risk Illustrations - Advanced Options - Alternative Outcomes

Last Modified on 13/02/2024 3:35 pm GMT

Alternative Outcome is found within the Advanced Options tab of the Results screen.

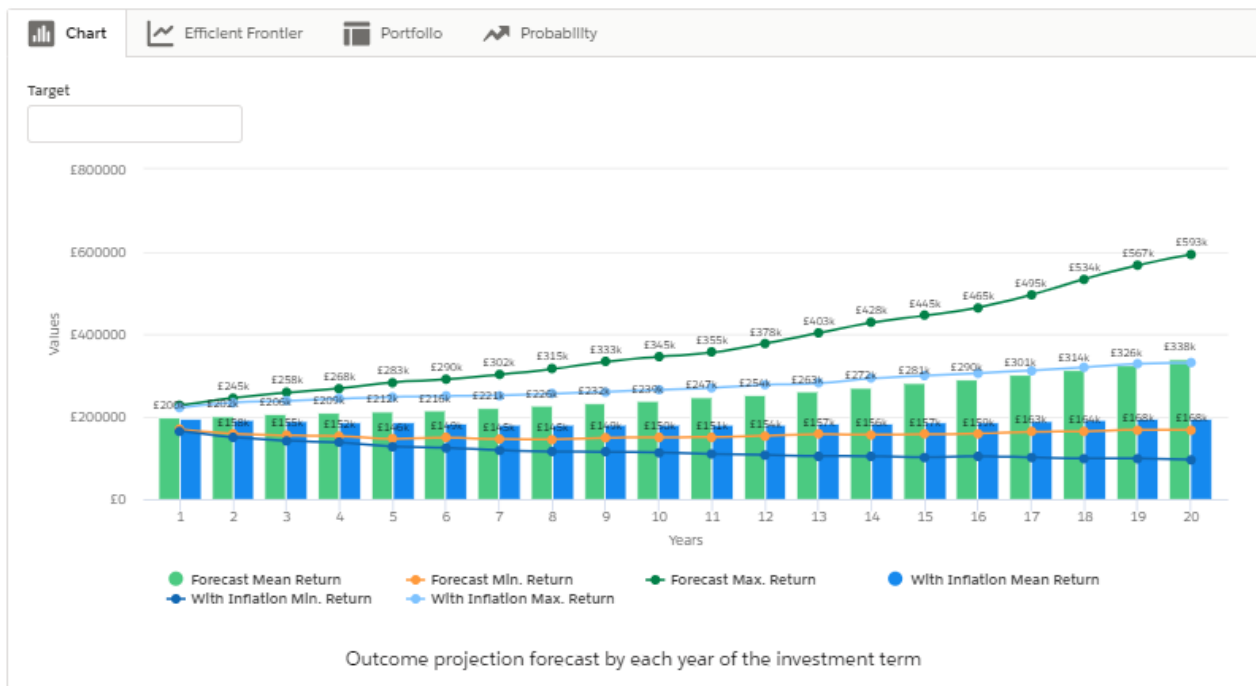

There are multiple alternative outcomes you can compare:

- Inflation
- No Fees
- 'What If' Scenario
- Sustainable Drawdown
- Solve Contributions

Selecting one of the options will populate the charts and the Alternative Outcome area.

In this example, we have selected Inflation. You will see Total Contributions During Term, Anticipated Outcome (Mean Gain), Lowest Outcome (Min. Gain 5% Chance) and the Best Outcome (Max. Gain 5% Chance) which include the impact of inflation.

The screenshot displays the 'Compare Alternate Outcomes' interface. At the top, there is a blue header with the text 'Compare Alternate Outcomes'. Below this, the 'Quick Toggles' section contains two buttons: 'With Inflation' (which is highlighted in blue and has a mouse cursor pointing to it) and 'No Fees'. Underneath, the 'Advanced Options' section features three buttons: 'What If', 'Drawdown', and 'Solve'. The 'Term Matrix' section follows, with a sub-header 'Term Matrix' and a description: 'Explore the Impact of term and risk using the target Illustration as the reference.' Below this, there are two dropdown menus: 'Select an alternative Term' and 'Select an alternative Risk Category', both currently set to 'None'.
