

Company Settings - Branding

Last Modified on 26/02/2024 3:54 pm GMT

Your brand colours can be added here – you will need the HEX code of your primary colour and secondary colour.

The screenshot shows a 'Branding' settings form. At the top, it says 'The branding will be applied to the digital outputs.' Below this are three sections: 'Primary Color' with a blue color swatch and the hex code '#122EFF'; 'Secondary Color' with a pink color swatch and the hex code '#DD15A1'; and 'Company Logo' with an 'Upload Files' button and the text 'Or drop files'. Below these is a 'Related Files of the record' section with a table. The table has columns for 'File Name', 'File Extension', and 'Preview'. One row is visible with 'SynExampleLogo.png' and 'png'. At the bottom of the form are 'Cancel' and 'Save' buttons.

File Name	File Extension	Preview
SynExampleLogo.png	png	Preview

This image is a close-up of the 'Primary Color' field. A tooltip bubble points to the color swatch, containing the text 'Enter HEX Code eg: #FFFFFF White'. The color swatch is currently blue with the hex code '#122EFF' displayed next to it.

If you click in the colour drop down box, you will be able to select the colour or enter the RGB:

This image shows a color picker dialog box. It features a large color selection area at the top, a horizontal rainbow color bar below it, and input fields for 'Hex', 'R', 'G', and 'B'. The 'Hex' field contains '#122EFF', 'R' contains '18', 'G' contains '46', and 'B' contains '255'. At the bottom are 'Cancel' and 'Done' buttons. A mouse cursor is shown clicking on the blue color swatch in the background form.

A Company Logo can be uploaded (this will appear on digital outputs) click 'Upload Files' to select the file or files can be dropped into the box:

Branding
