

Synaptic Pathways Due Diligence

Last Modified on 11/11/2024 2:40 pm GMT

To help you carry out your due diligence, we have put together responses to the most commonly asked questions within this document available for download:

[Synaptic Pathways Due Diligence.pdf](#) 

We are happy to carry out more detailed due diligence on request.

For Comparator customers still using this legacy software, this Pathways document can be used as a reference for due diligence purposes. Pathways is the new generation of the Synaptic illustrations engine, which replaces our legacy Comparator software. As Comparator is no longer supported, there is no separate due diligence document being maintained. Comparator customers should refer to the latter sections of this Pathways document E.g. Data Updates Frequencies and Notes on Research Data for Comparison Research. These sections apply to both our legacy and new generation software illustrations and cover the most commonly asked questions.
