

# Income Analysis - Advanced Options - Selecting a preferred scenario

Last Modified on 19/12/2024 12:53 pm GMT

This article is a continuation of [Income Analysis - Advanced Options - Compare](#)

When you have compared the scenarios, pick the preferred scenario by selecting it from the dropdown

The screenshot shows the 'Advanced Options' section of the software. On the left, there are tabs for 'Illustration Settings & Income', 'Income Requirements', and 'Report'. The 'Preferred Scenario' dropdown menu is open, showing a list of scenarios: 'Test Scenario 3 (Preferred)', 'Income Analysis Research Dec 2', 'Test Scenario 1' (highlighted with a red box), 'Test Scenario 2', and 'Test Scenario 3 (Preferred)'. Below the dropdown is a bar chart showing 'Income' on the y-axis (ranging from £0 to £250,000) and 'Age' on the x-axis (ranging from 67 to 95). A vertical red line indicates 'Life Expectancy' at age 90. The chart shows a large orange bar at age 67 representing the initial lump sum, followed by smaller bars for various income sources (State Pension, Buy to let, Savings Account) and a line for 'Required Income'. The 'Income Requirements' panel on the right shows 'Income Type' set to 'Level Income' and 'Profited Income', with 'Regular Income Amounts' and 'Living Expenses' for ages 67-72 and 72-83.

Once selected it will show (Preferred) in title:

This close-up shows the 'Preferred Scenario' dropdown menu. The selected option is 'Test Scenario 1 (Preferred)'. The dropdown menu is open, showing the list of scenarios: 'Test Scenario 3 (Preferred)', 'Income Analysis Research Dec 2', 'Test Scenario 1 (Preferred)', 'Test Scenario 2', and 'Test Scenario 3 (Preferred)'. The 'Test Scenario 1 (Preferred)' option is highlighted. To the right of the dropdown are buttons for 'Delete', '+ New', and 'Compare'.

This will be used as the chosen scenario in the report.

Additional scenarios will also be listed in the report as considered.
