

# Company Settings - Stress Test

25/02/2025 1:05 pm GMT

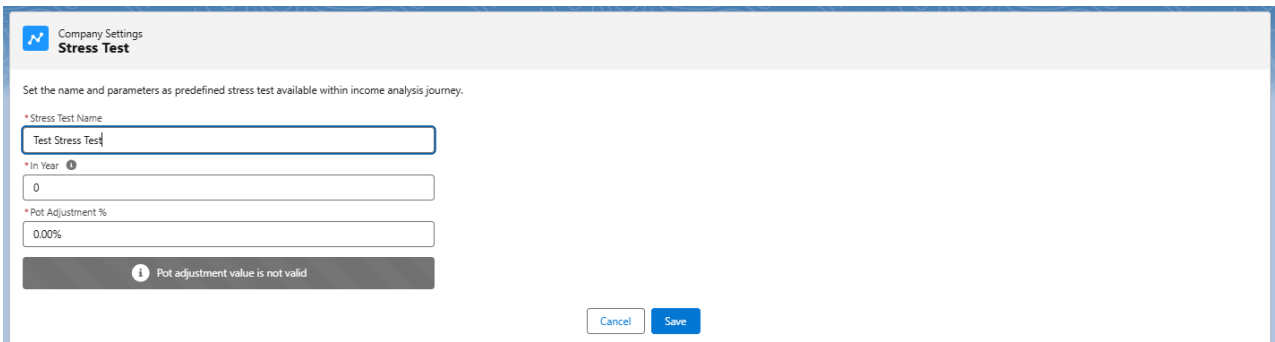

When creating scenarios within the Advanced Options area of the Income Analysis journey, you are able to select market event scenarios in the Scenario Editor. These include for e.g. a Global financial crisis', Covid 19 Pandemic and Dot-com bubble. See article - [Income Analysis - Advanced Options - Scenario Editor](#) for more information.

You can create your own market event in Configuration>Company Information> Stress Test.

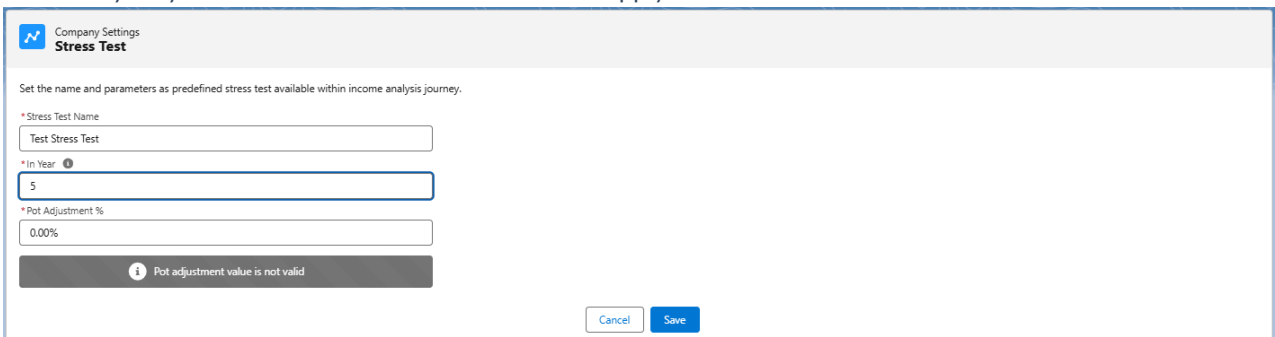

This area allows you to set a Stress Test that will appear in the Income Analysis module.

Set a Stress Test Name:

Enter the year you would like the test market event to apply to:

Enter the percentage amount. This will adjust the pot to show the effect of a particular or proposed event on the client's retirement plan.

**Company Settings**  
**Stress Test**

Set the name and parameters as predefined stress test available within income analysis journey.

\* Stress Test Name

\* In Year

\* Pot Adjustment %

**-17.00%**      **0.00% in year 5**
