

Why does the Transaction Cost Ex-Ante differ to other sources?

14/05/2025 9:12 am BST

There may be a difference compared to values showing in other sources for transaction costs. This is because we are primarily consuming one of the newer specific UK EMT v4.2 fields '09010_Financial_Instrument_Transaction_Costs_Ex_Ante_UK' in the first instance.

Other source may be showing the original field value '07130_Financial_Instrument_Transaction_Costs_Ex_Ante'.
